

Single-stage Pumps
with Horizontal Shaft

BHR

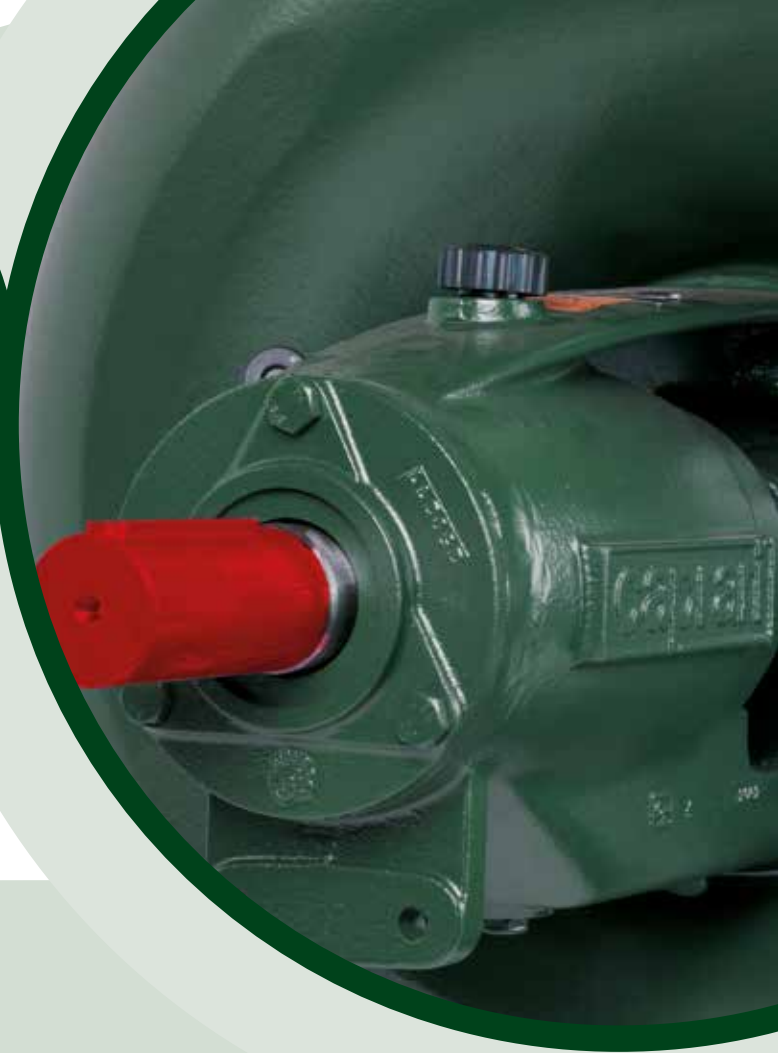

caprari

pumping power

BHR series are single-stage centrifugal pumps, horizontal shaft, single suction, with a tough and monolithic structure sized to ensure a high degree of rigidity, an essential feature when these pumps are coupled to combustion engines. Thanks to their particular features, these pumps offer optimum solutions when it comes to reliability and energy saving, while long lasting performance are guaranteed.

CERTIFICATION FOR USE WITH DRINKING WATER: DM174, WRAS, ACS

- ☐ Machines conform to Directive 2009/125/EC (EcoDesign - ErP).
- ☐ Pump casing volute type with axial flanged suction inlet and flanged delivery outlet in radial position, normally horizontally oriented; and, on request, rotated: simplify installation.
- ☐ Impeller dynamically-balanced, mixed flow design: reliability.
- ☐ Shaft protected by a bush at the gland and lined by two double-row oil-lubricated ball-bearings: ensure long life.
- ☐ Seal adjustable, easily replaceable: simplify maintenance.
- ☐ Safe connection to either electric motor or internal combustion engine.

APPLICATIONS

aqueducts

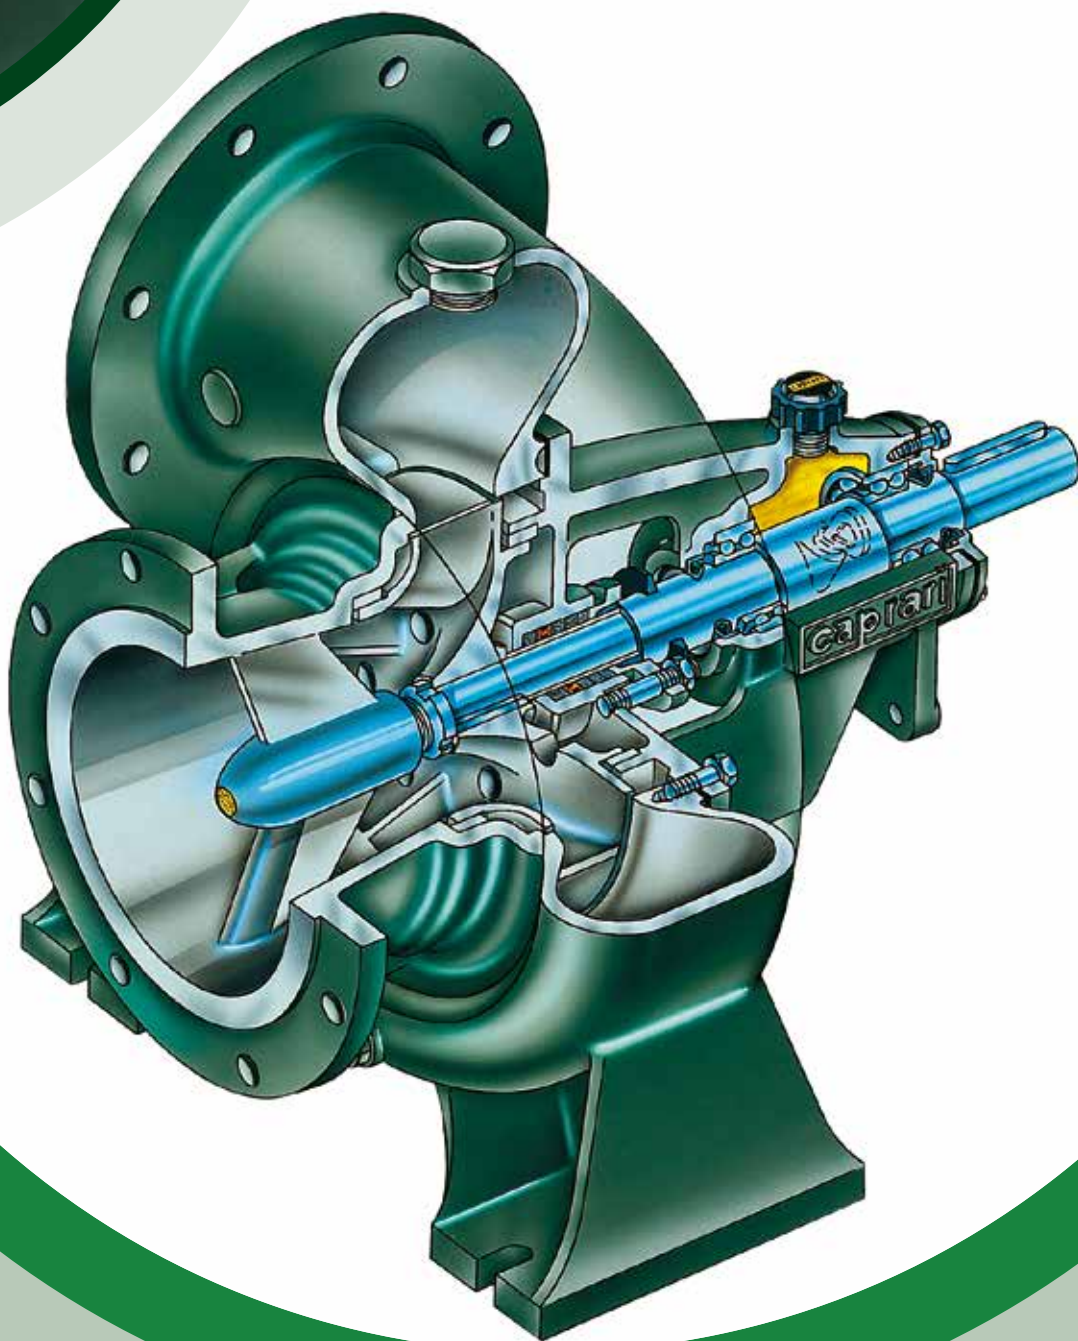

water supply

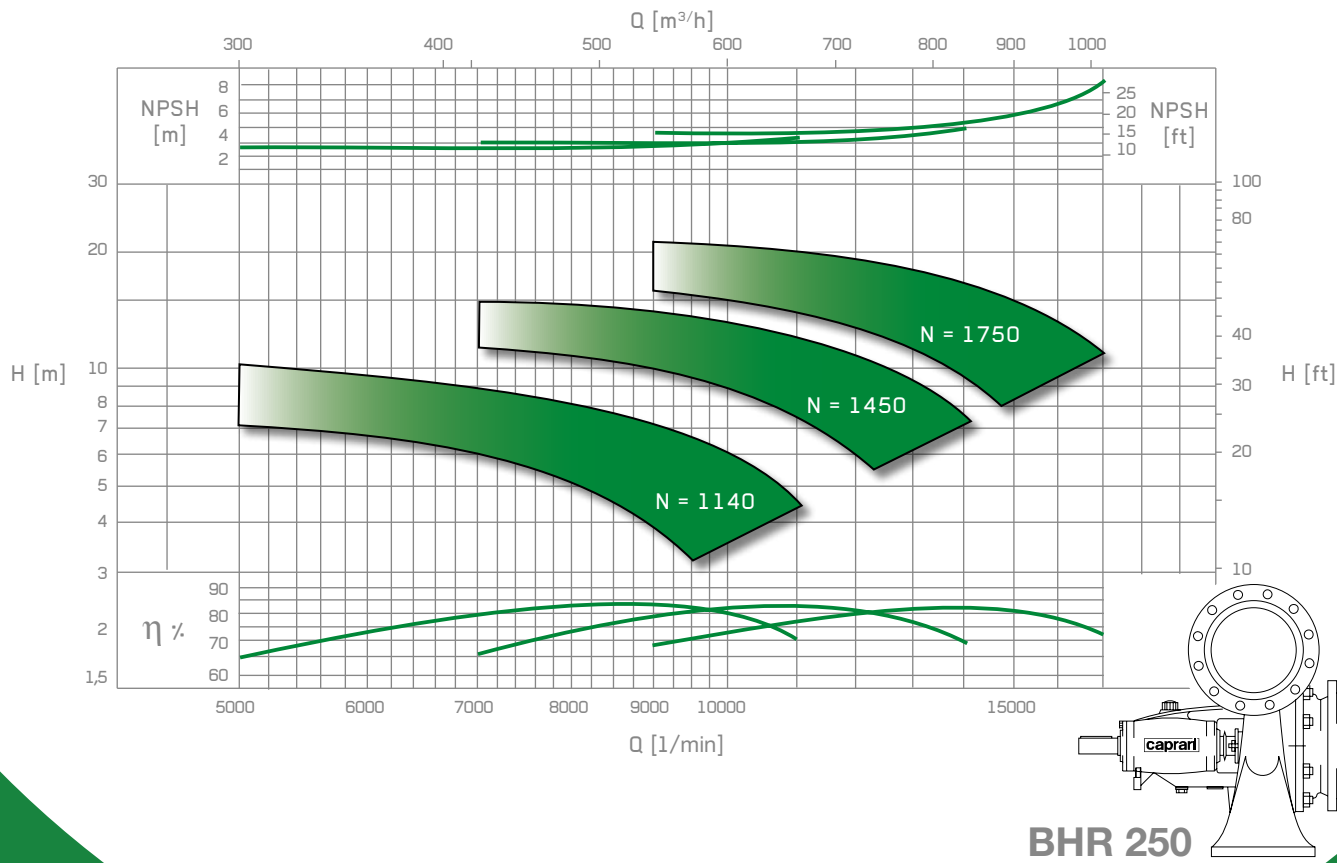

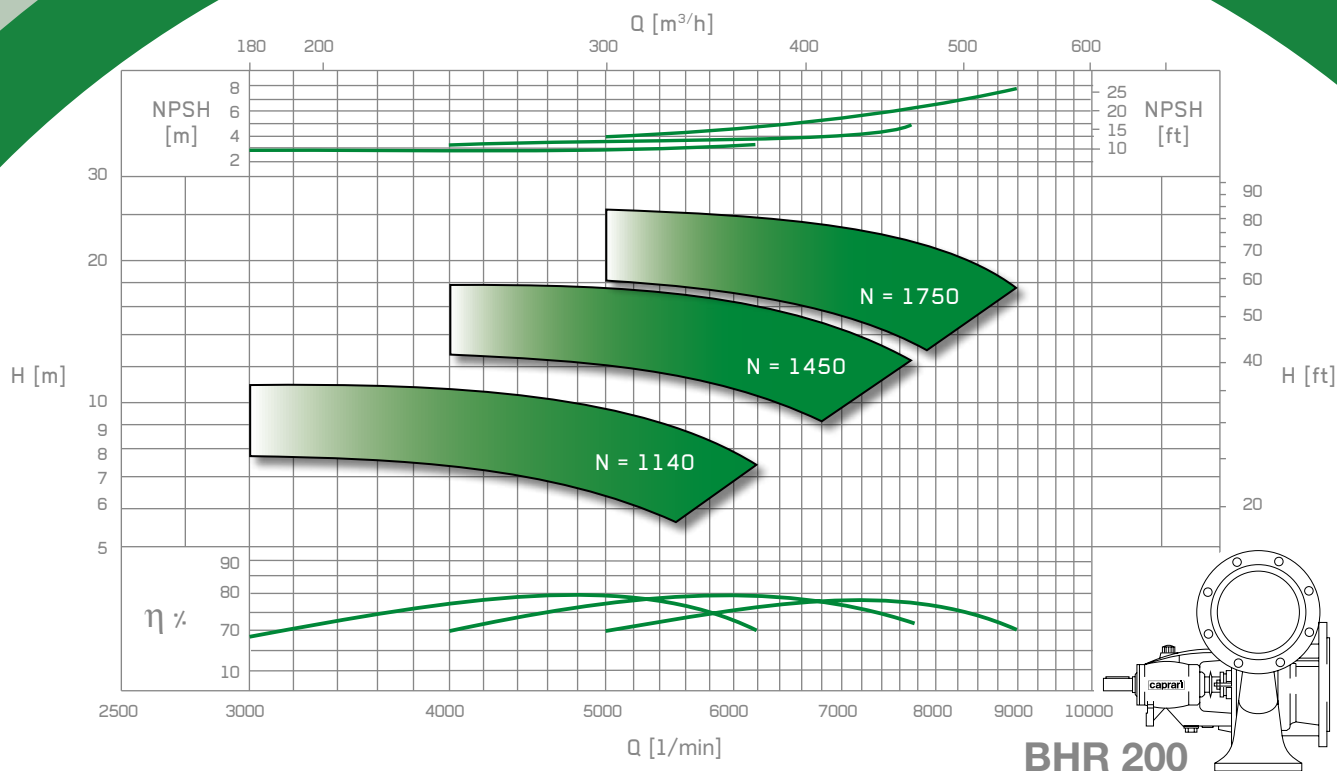

fish farming

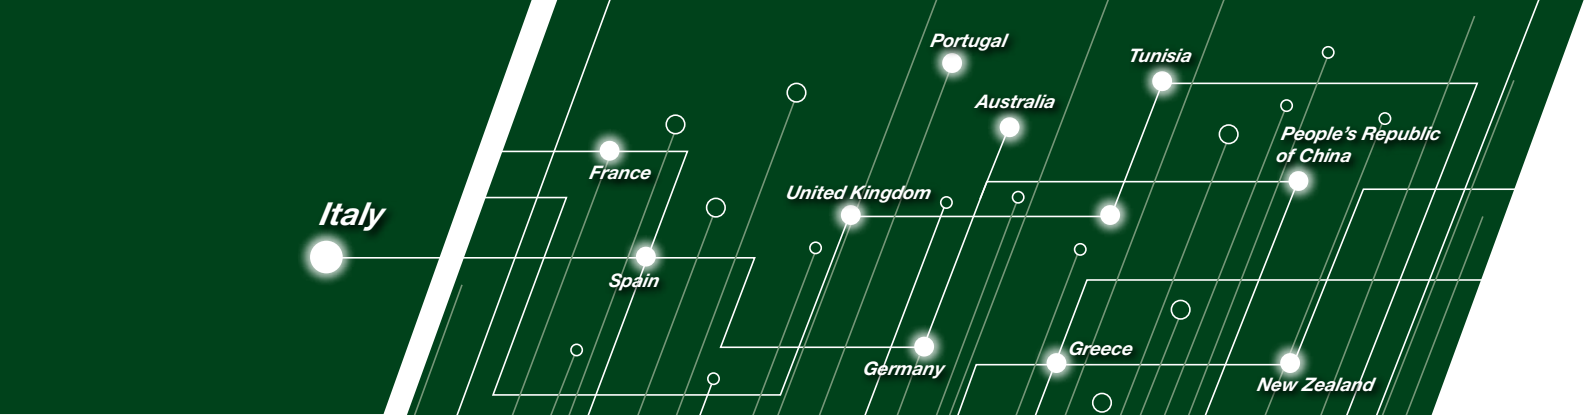

industrial applications

leisure parks

irrigation
